LAND AND WATER CONSERVATION FUND

STATE ASSISTANCE PROGRAM

The Need for LWCF State Assistance in Michigan

Presidential outdoor recreation studies under three different administrations in 1964, 1986 and 2010, as well as an independent report by a non partisan Outdoor Recreation Resources Group in 2009 have all documented the importance and need for the LWCF. And underscored the benefits to the nation of providing places for outdoor recreation close to home.

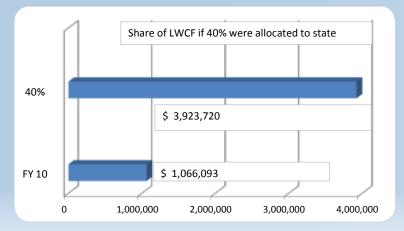

LWCF State Assistance Program in Michigan

Michigan has grown in recent years and so has the need for outdoor recreation resources. The National Park Service reported the average annual need for recreational facilities development in Michigan over the last three fiscal years was \$ 143,420,886. One of the primary reasons for the size of this need has been the lack of equity in the distribution of the LWCF to the states which led to reduced State Assistance appropriations. In FY 2010 the LWCF distribution to Michigan was \$ 1,066,093 which barely funded smaller local needs for projects and met a minimal level of the total need.

What would a 40% Allocation to the State Assistance Program Accomplish?

If in FY 2010, 40 % of the LWCF was available to the states, Michigan would have received \$ 3,923,720 for local and state grants, which when matched would provide an additional \$7,847,440 in parks and open space improvements, addressing 5 % of the total annual need. Over the long term, with this level of funding and the matching requirement applied, much of the backlog of projects identified in Michigan would be have been addressed. This graph demonstrates the level of funding that was provided to the state in FY 10 and how much more would have been available in Michigan if a 40% state share had been required. It is essential to restore equity, so that outdoor recreation needs close to home can be addressed.

What benefits would be gained in Michigan from requiring a 40% allocation in LWCF?

- 1. Locally based projects support millions of dollars of economic activity throughout in Michigan.
- 2. Locally based projects provide citizens access to outdoor activity saving millions in community health benefits.
- 3. LWCF park projects in Michigan increase property values and strengthen the tax base.
- 4. Research shows that parks supported by LWCF are key components in community development revitalization.
- 5. LWCF projects in Michigan provide places for local and regional sports and community events.
- 6. LWCF projects provide direct benefits providing jobs and contracts for local businesses and employees.

Where can I find a listing of Michigan projects and the communities that have benefitted from this program?

Data from the NPS shows that, on a national basis, 98% of all communities in our country have utilized state and local LWCF grants for projects in the past. You can find the projects for each county in Michigan by going to the National Park Service State Assistance website at:

The LWCF has an impact in Michigan by providing economic benefits and jobs

A 2012 study by the Outdoor Industry Foundation showed that Outdoor recreation is an economic powerhouse in the United States. Each year the data shows that these activities generate \$646 billion in consumer spending and 6.1 million direct jobs in the industry. You can find more information on this study at:

The Outdoor Recreation Economy

TAKE IT OUTSIDE FOR MICHIGAN JOBS AND A STRONG ECONOMY

Outdoor recreation is essential to the American economy. Every year, Americans

spend **\$646 billion** on outdoor recreation — on gear, vehicles, trips, travel-related expenses and more. This creates jobs, supports communities, generates tax revenue and helps drive the economy. Throughout America, people recognize that outdoor recreation and open spaces attract and sustain families and businesses, create healthy communities and foster a high quality of life.

At least 63% of Michigan residents participate in outdoor recreation each year.¹

Michigan offers spectacular outdoor recreation opportunities at treasured destinations, including the **Upper Peninsula, the Huron-Manistee National Forests** and many others, bringing in dollars from residents and out-of-state visitors alike.

Outdoor Recreation Is Big Business in the UNITED STATES

Everything grows outside, including jobs and the economy. Americans want and deserve

access to a variety of quality places to play and enjoy the great outdoors. Outdoor recreation can grow jobs and drive the economy if we manage and invest in parks, waters and trails as an interconnected system designed to sustain economic dividends for America.

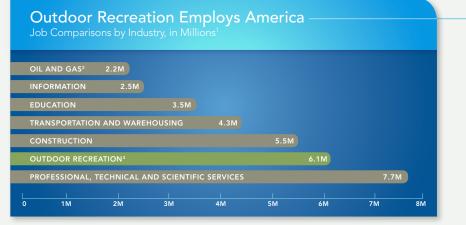

Nationally

outdoor recreation is bigger than you might think and a significant economic driver in the United States.
