

Based on the percentage estimate in questions 4 and your current apportionment amount, what would be the estimated total dollar amount you would request for administration of the LWCF program covered by the grant.

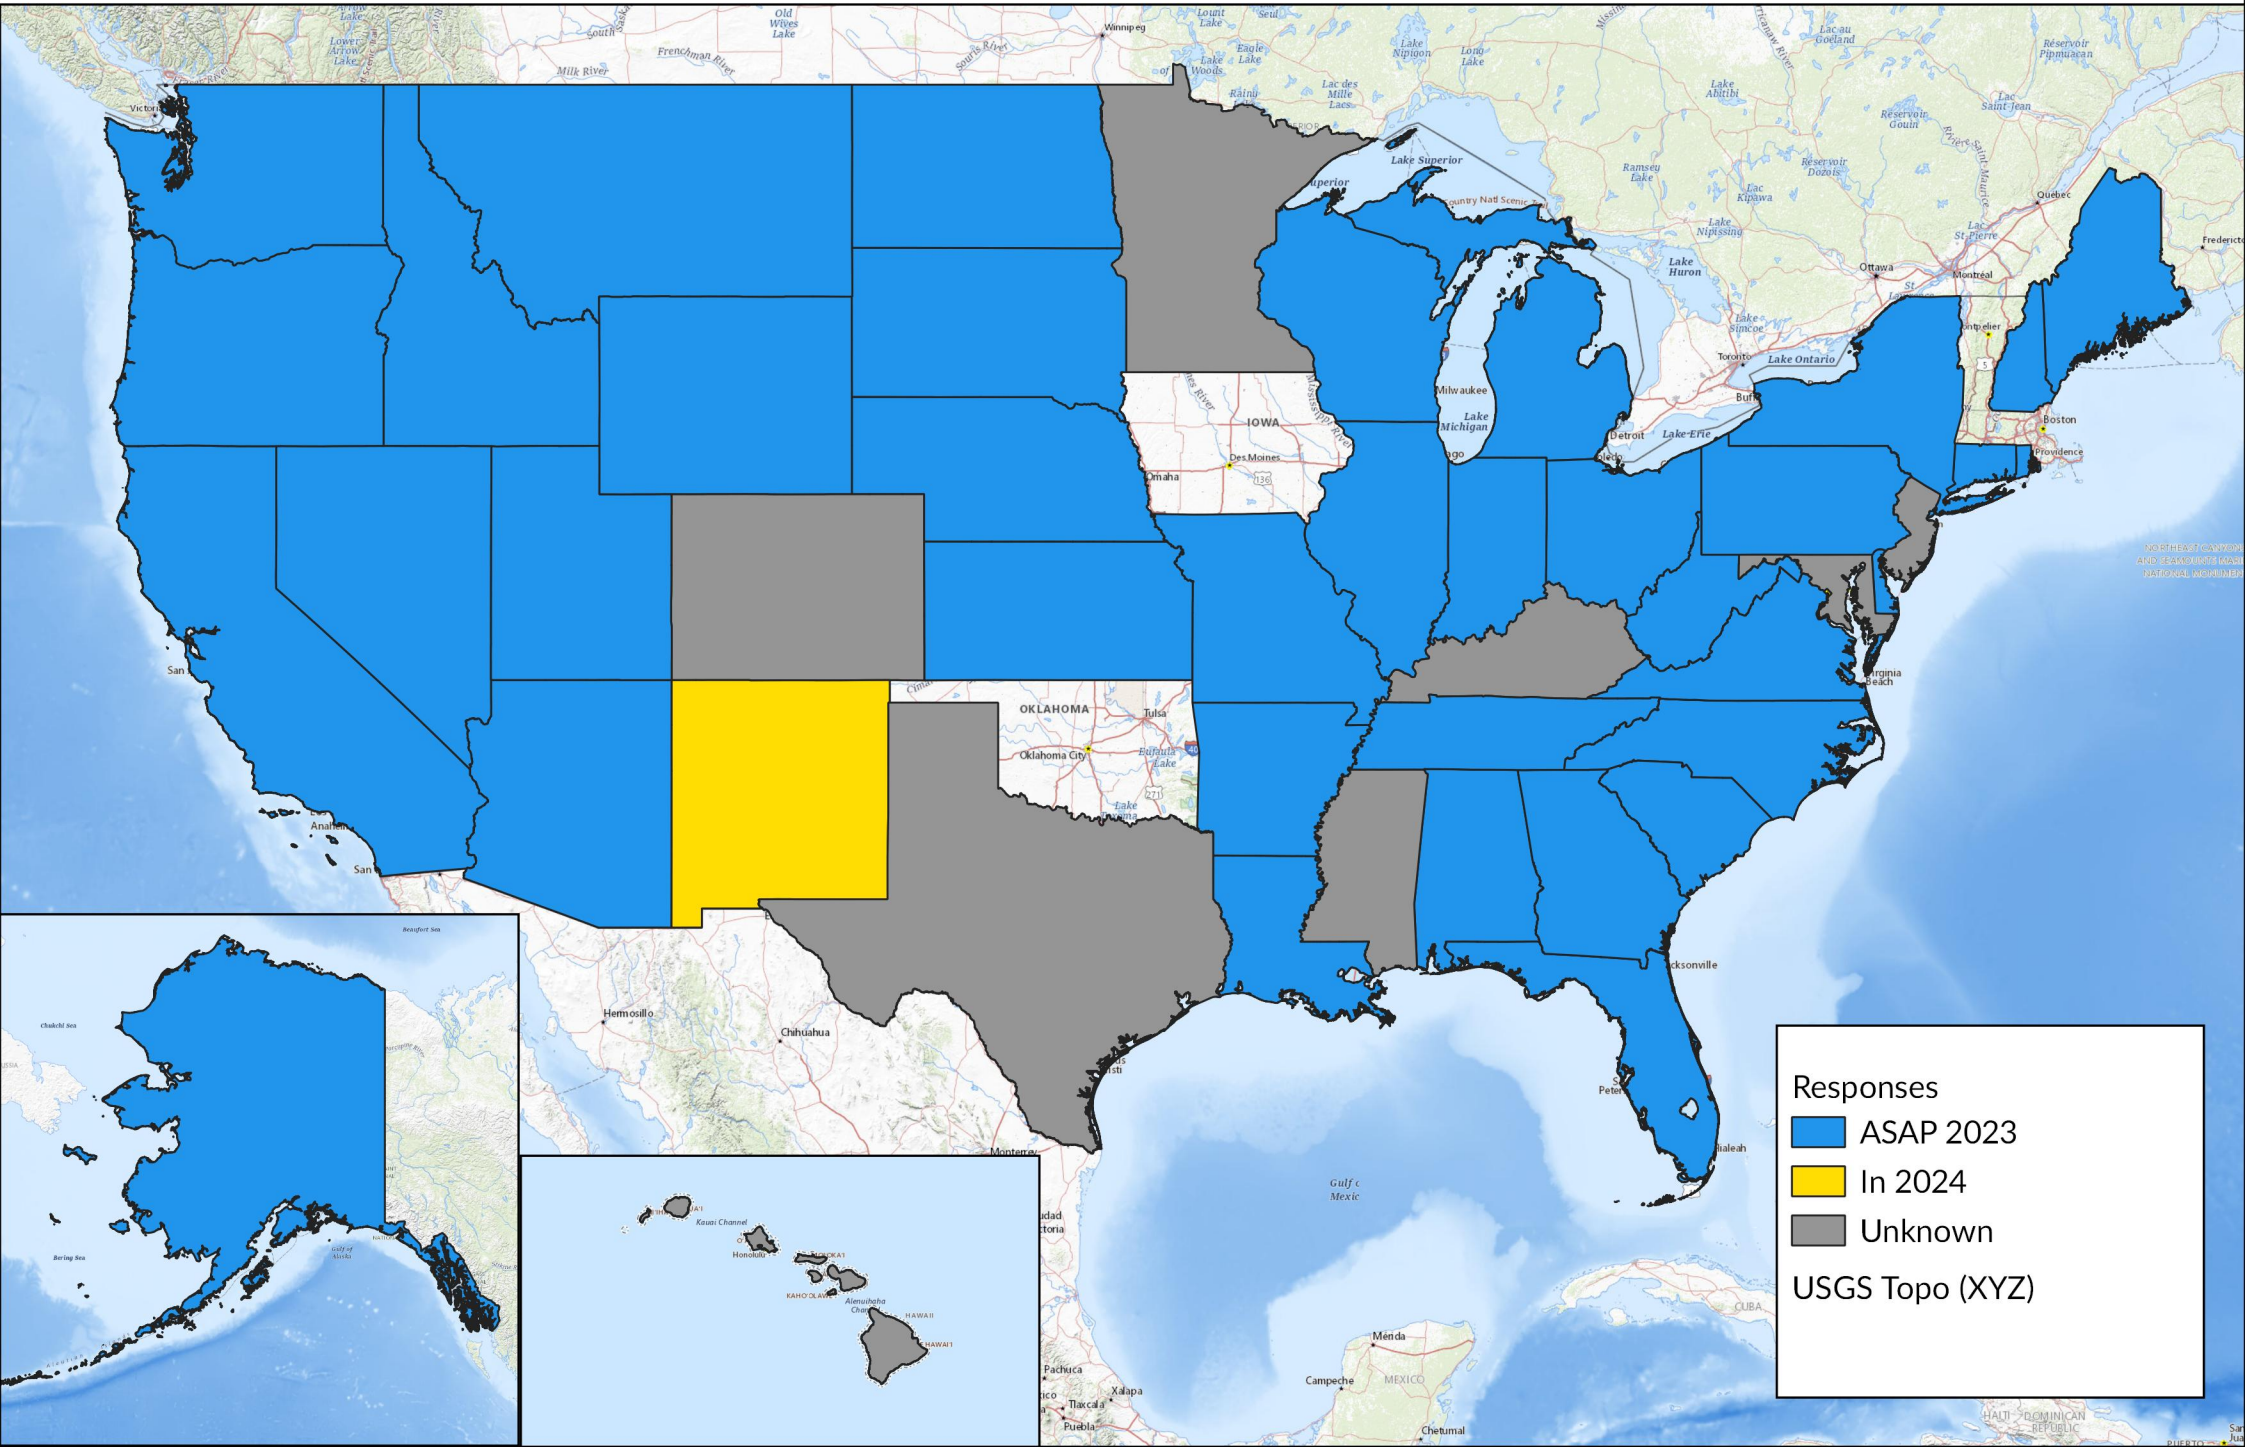

For those of you planning to submit an administrative grant request initially to cover a year of expenses, what % of your apportionment would you need ?

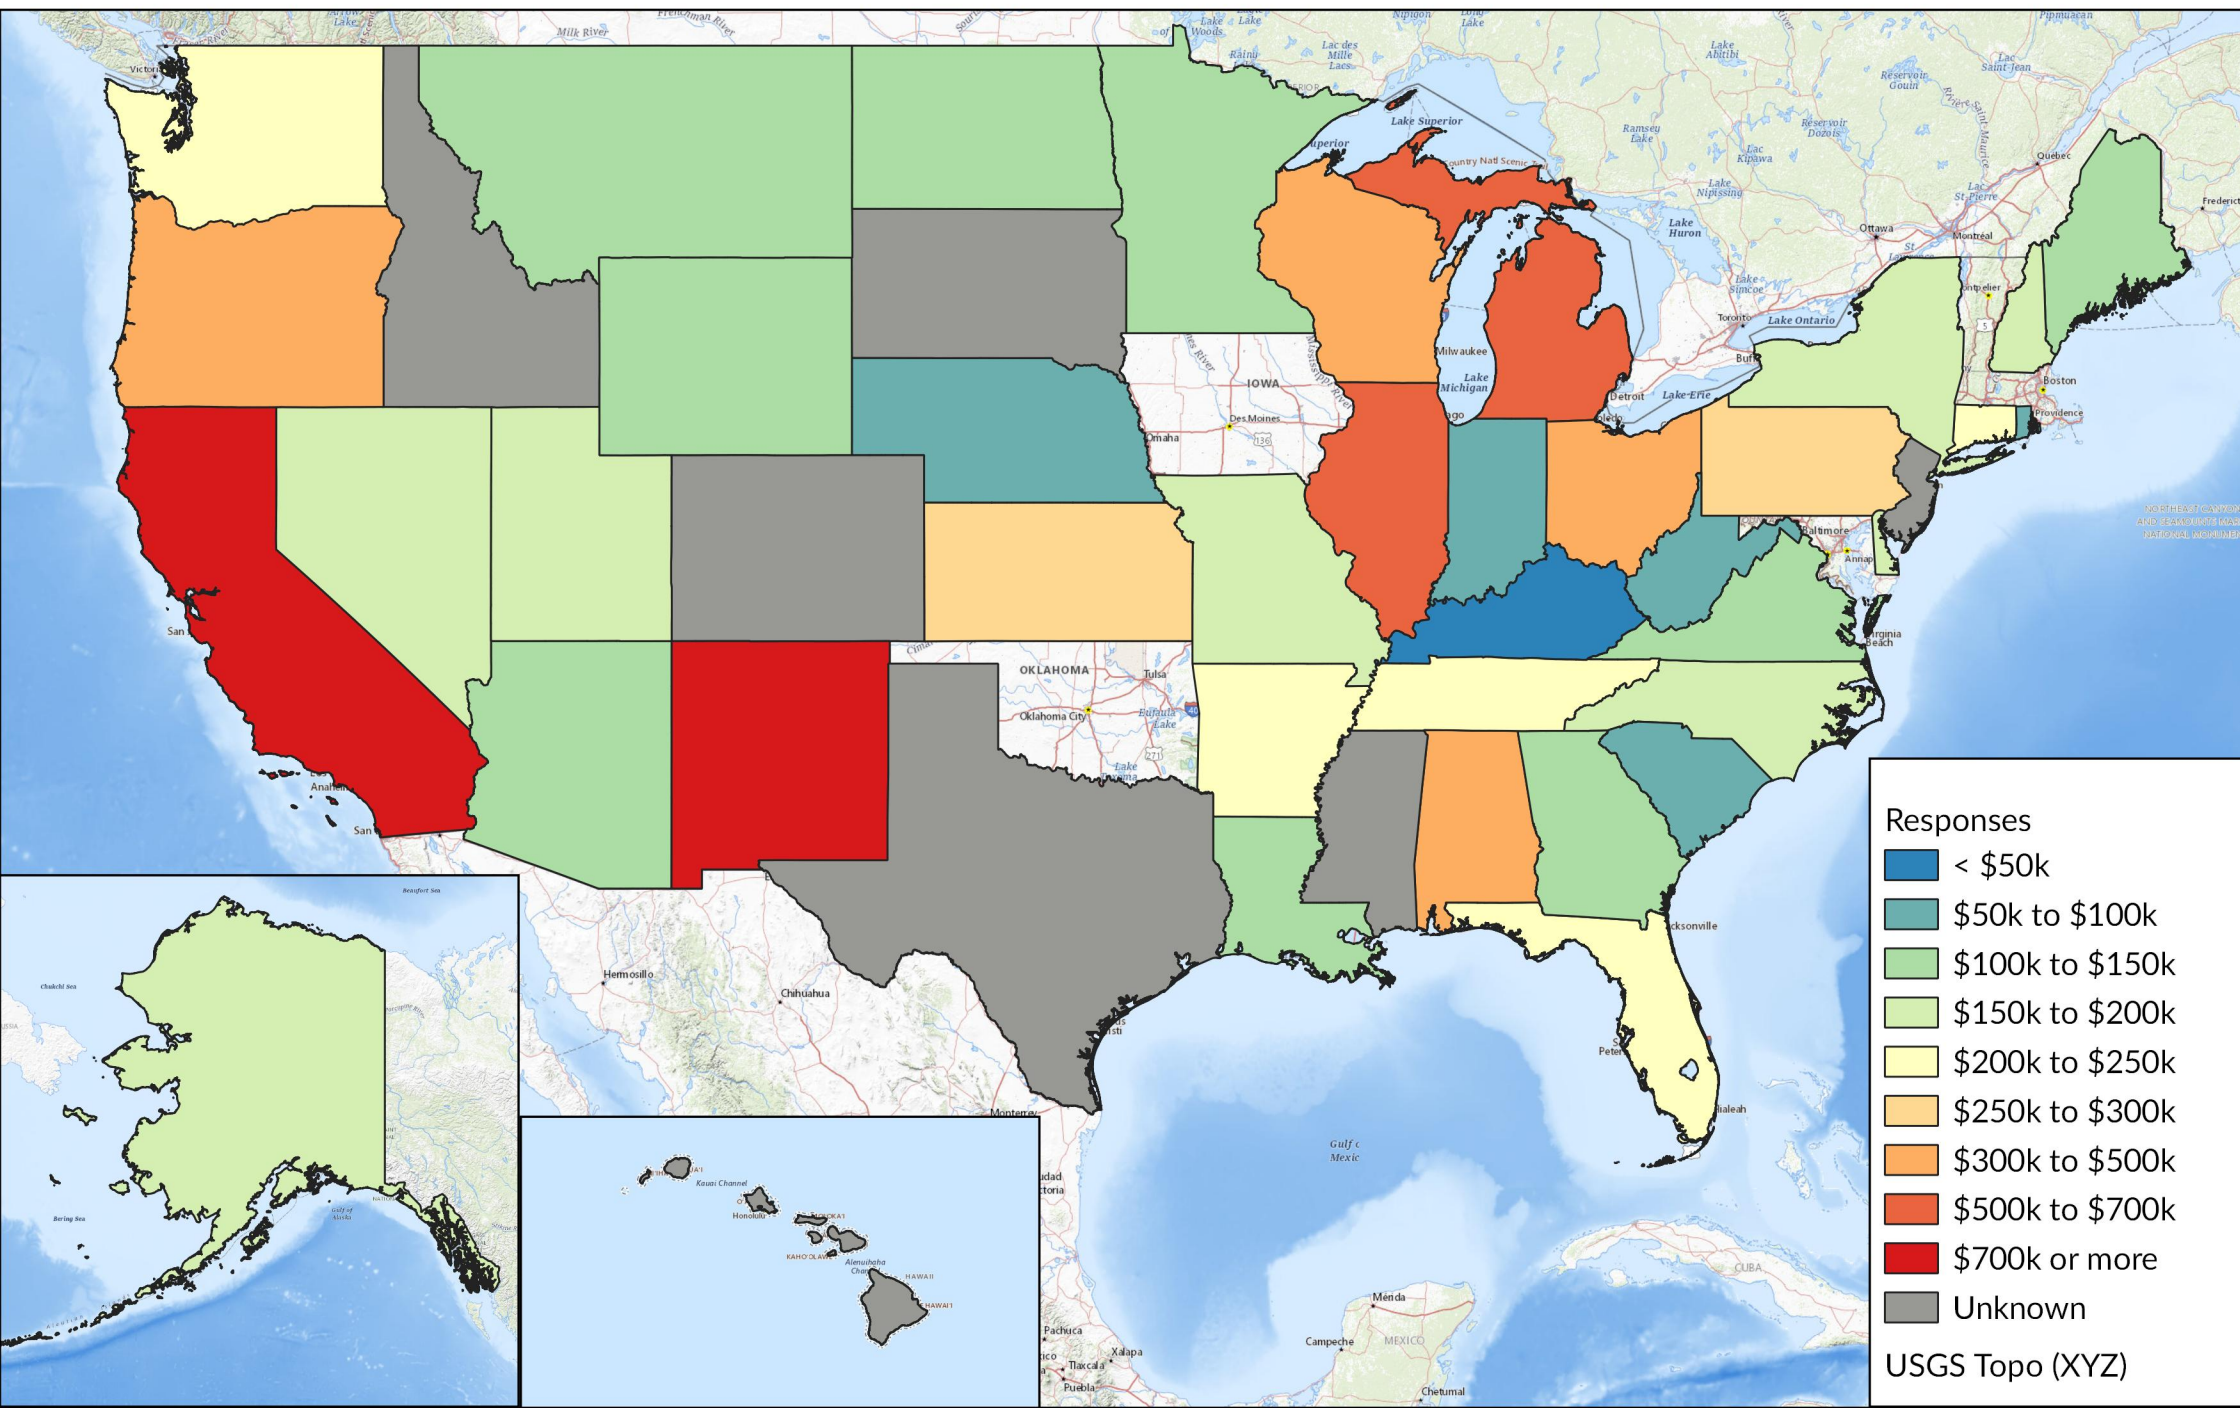

NPS has suggested the maximum federal share for administrative grants be capped at \$ 500,000. On a scale of 5 being strongly agree to 1 being strongly disagree, please respond below.

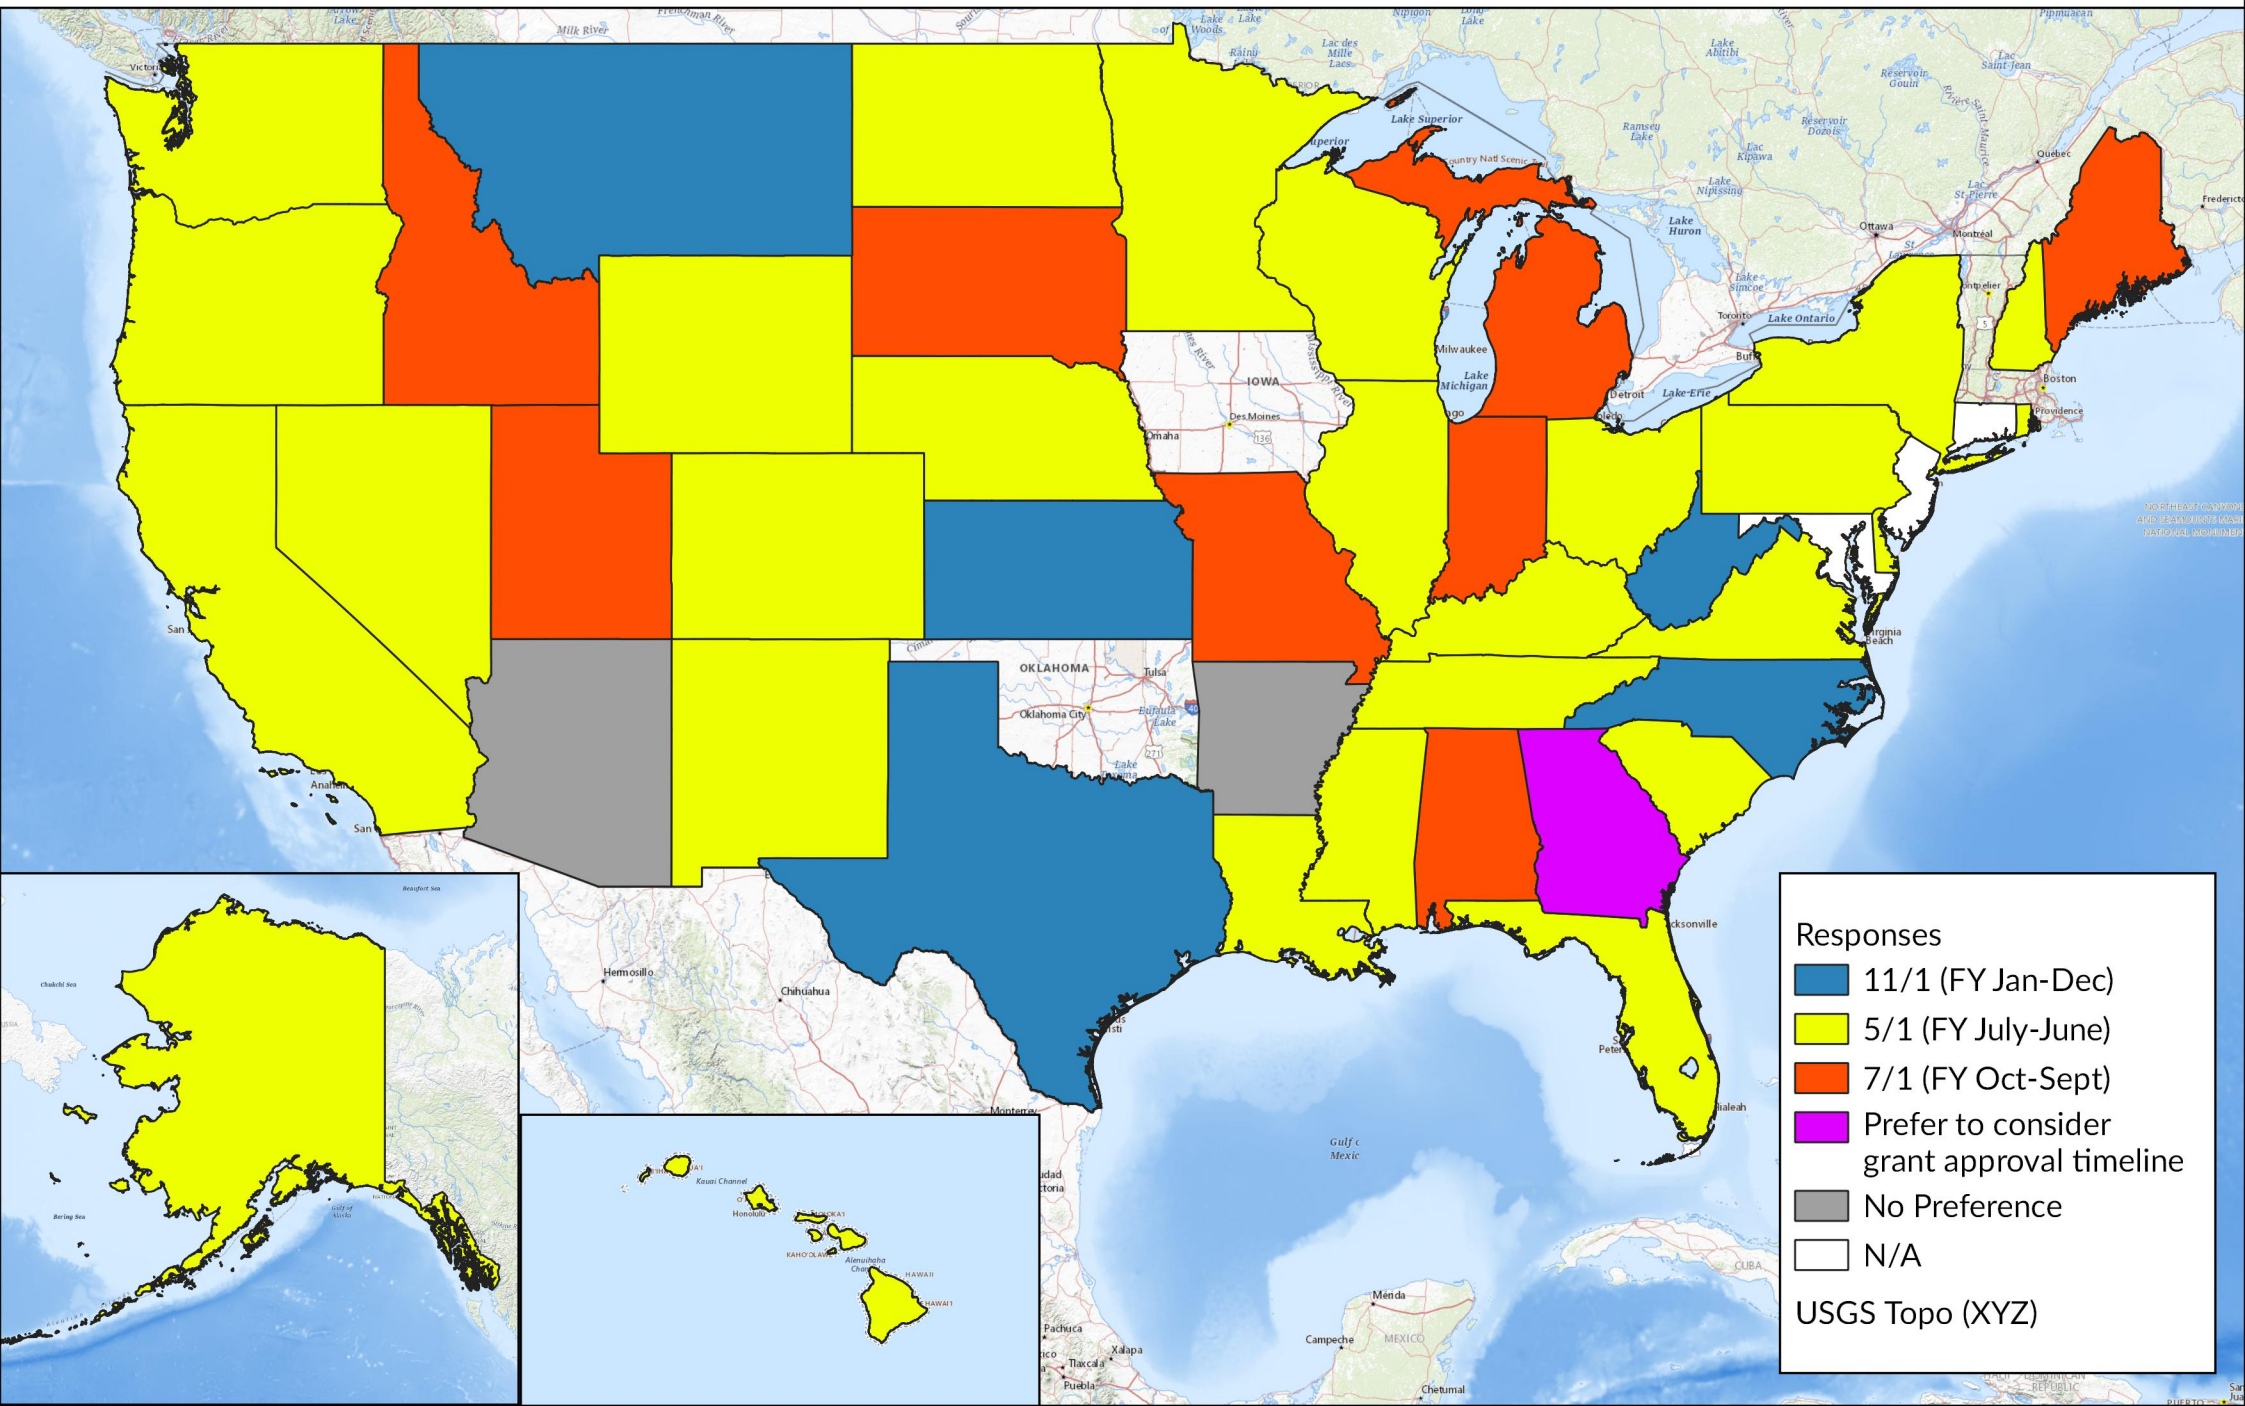

# If Yes, how soon would you submit an application for the administrative grant?

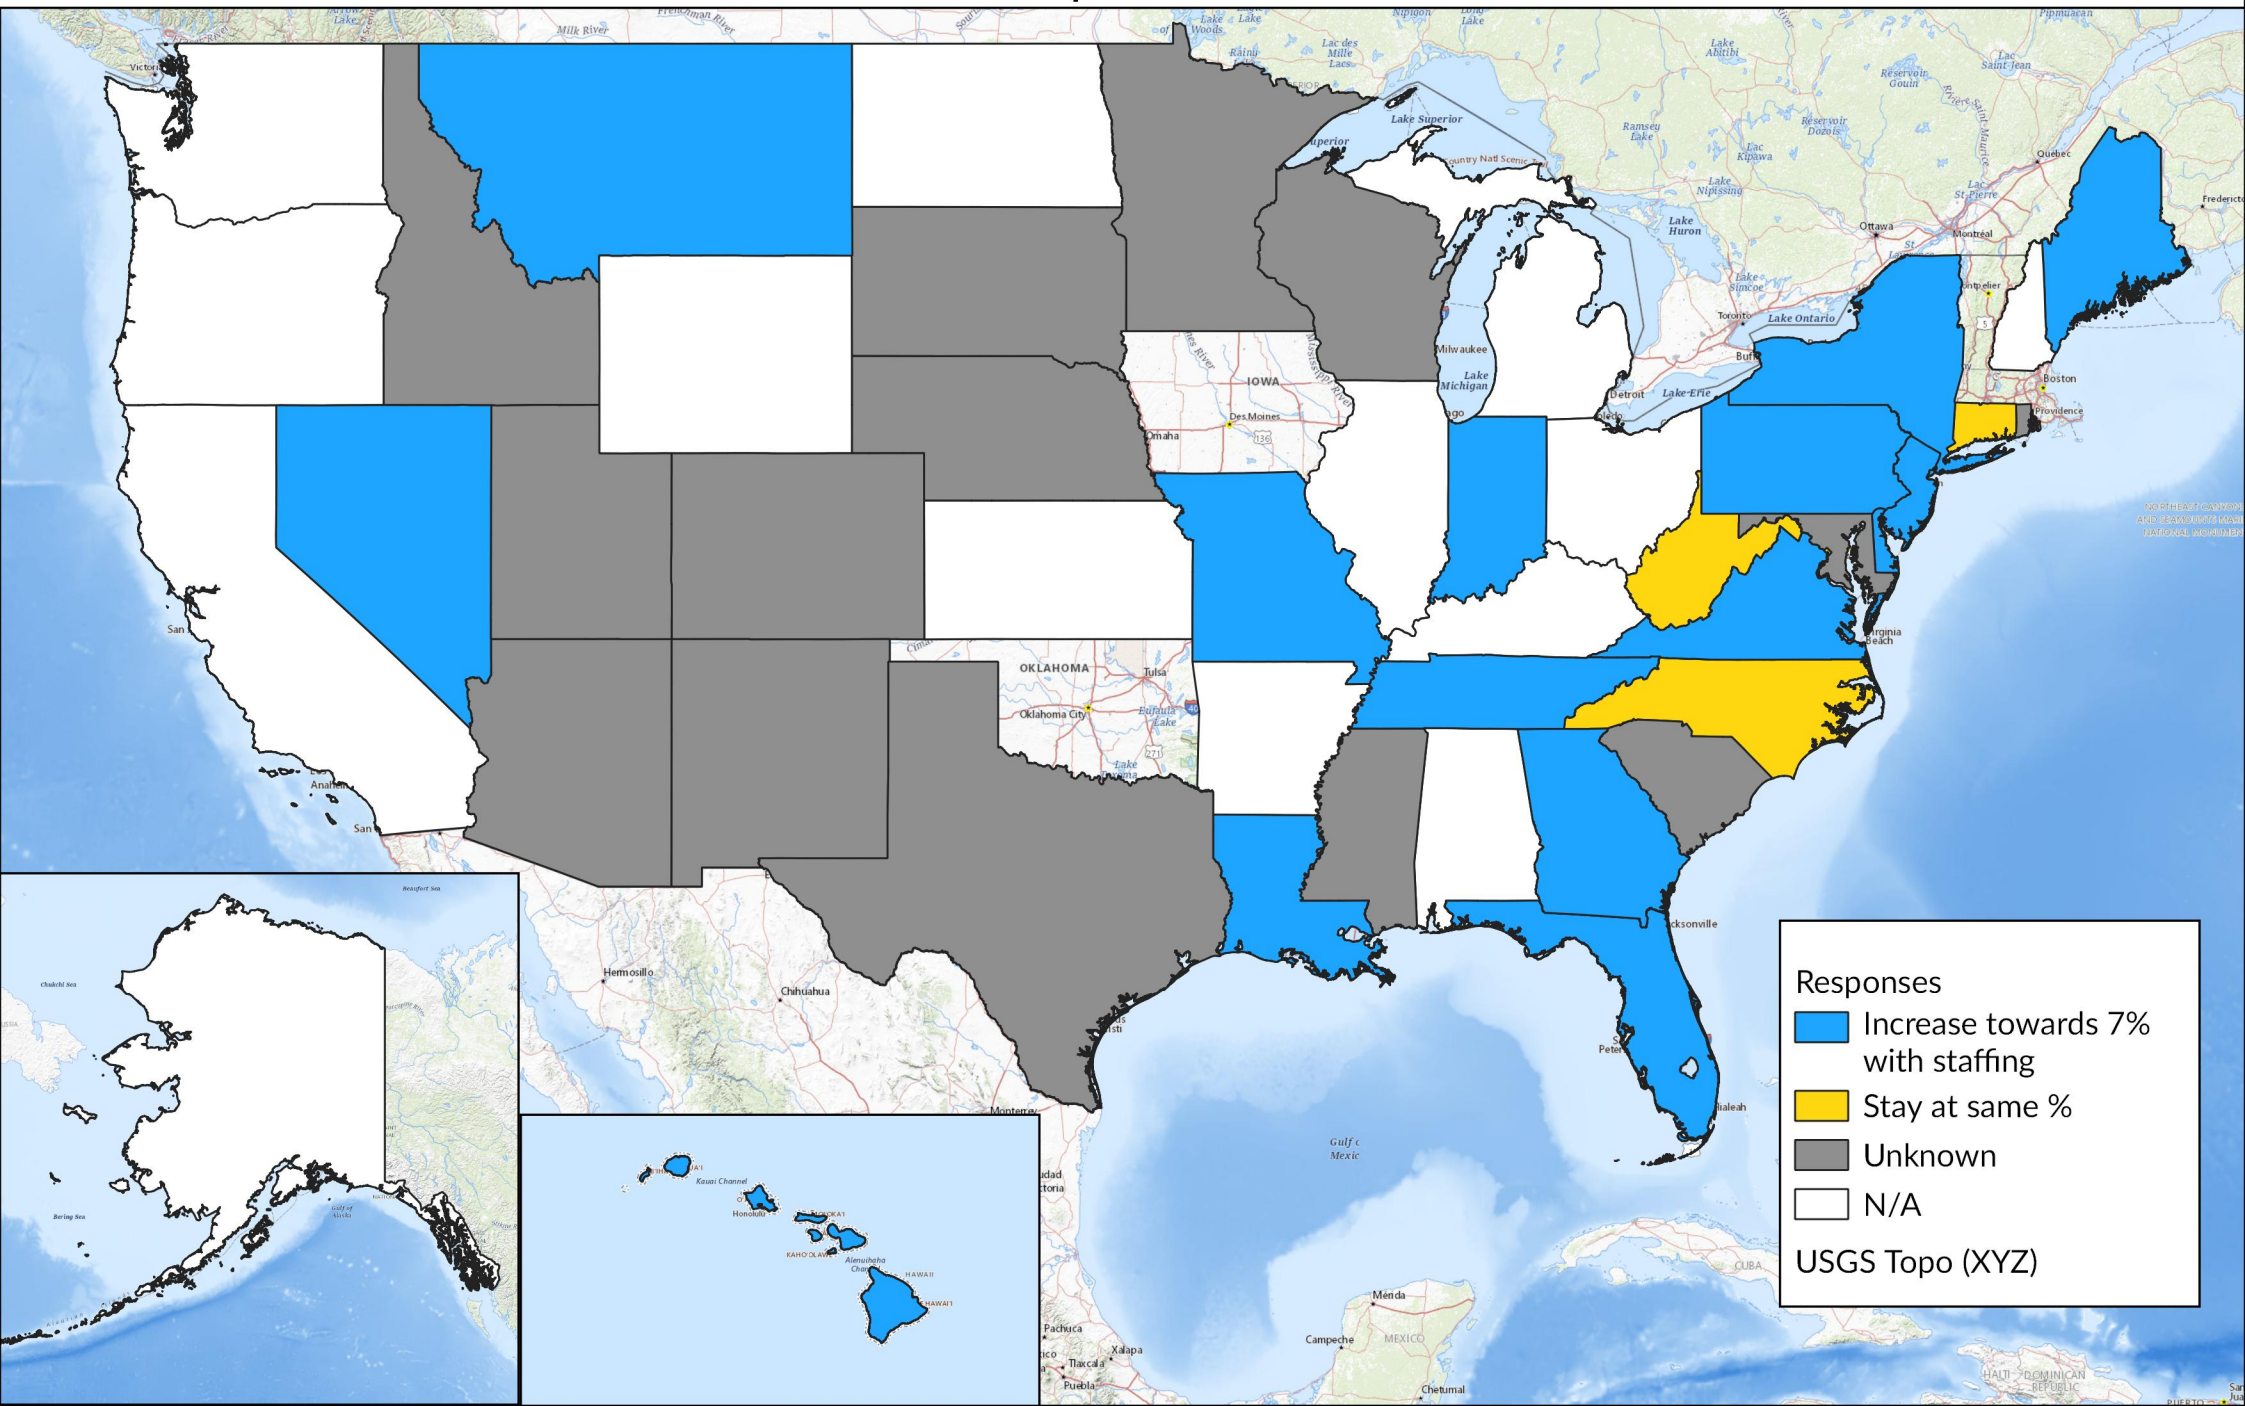

If you are planning to submit an administrative grant request what would you estimate to be the total dollar amount of this grant described in Question 5 dedicated to staffing the program?

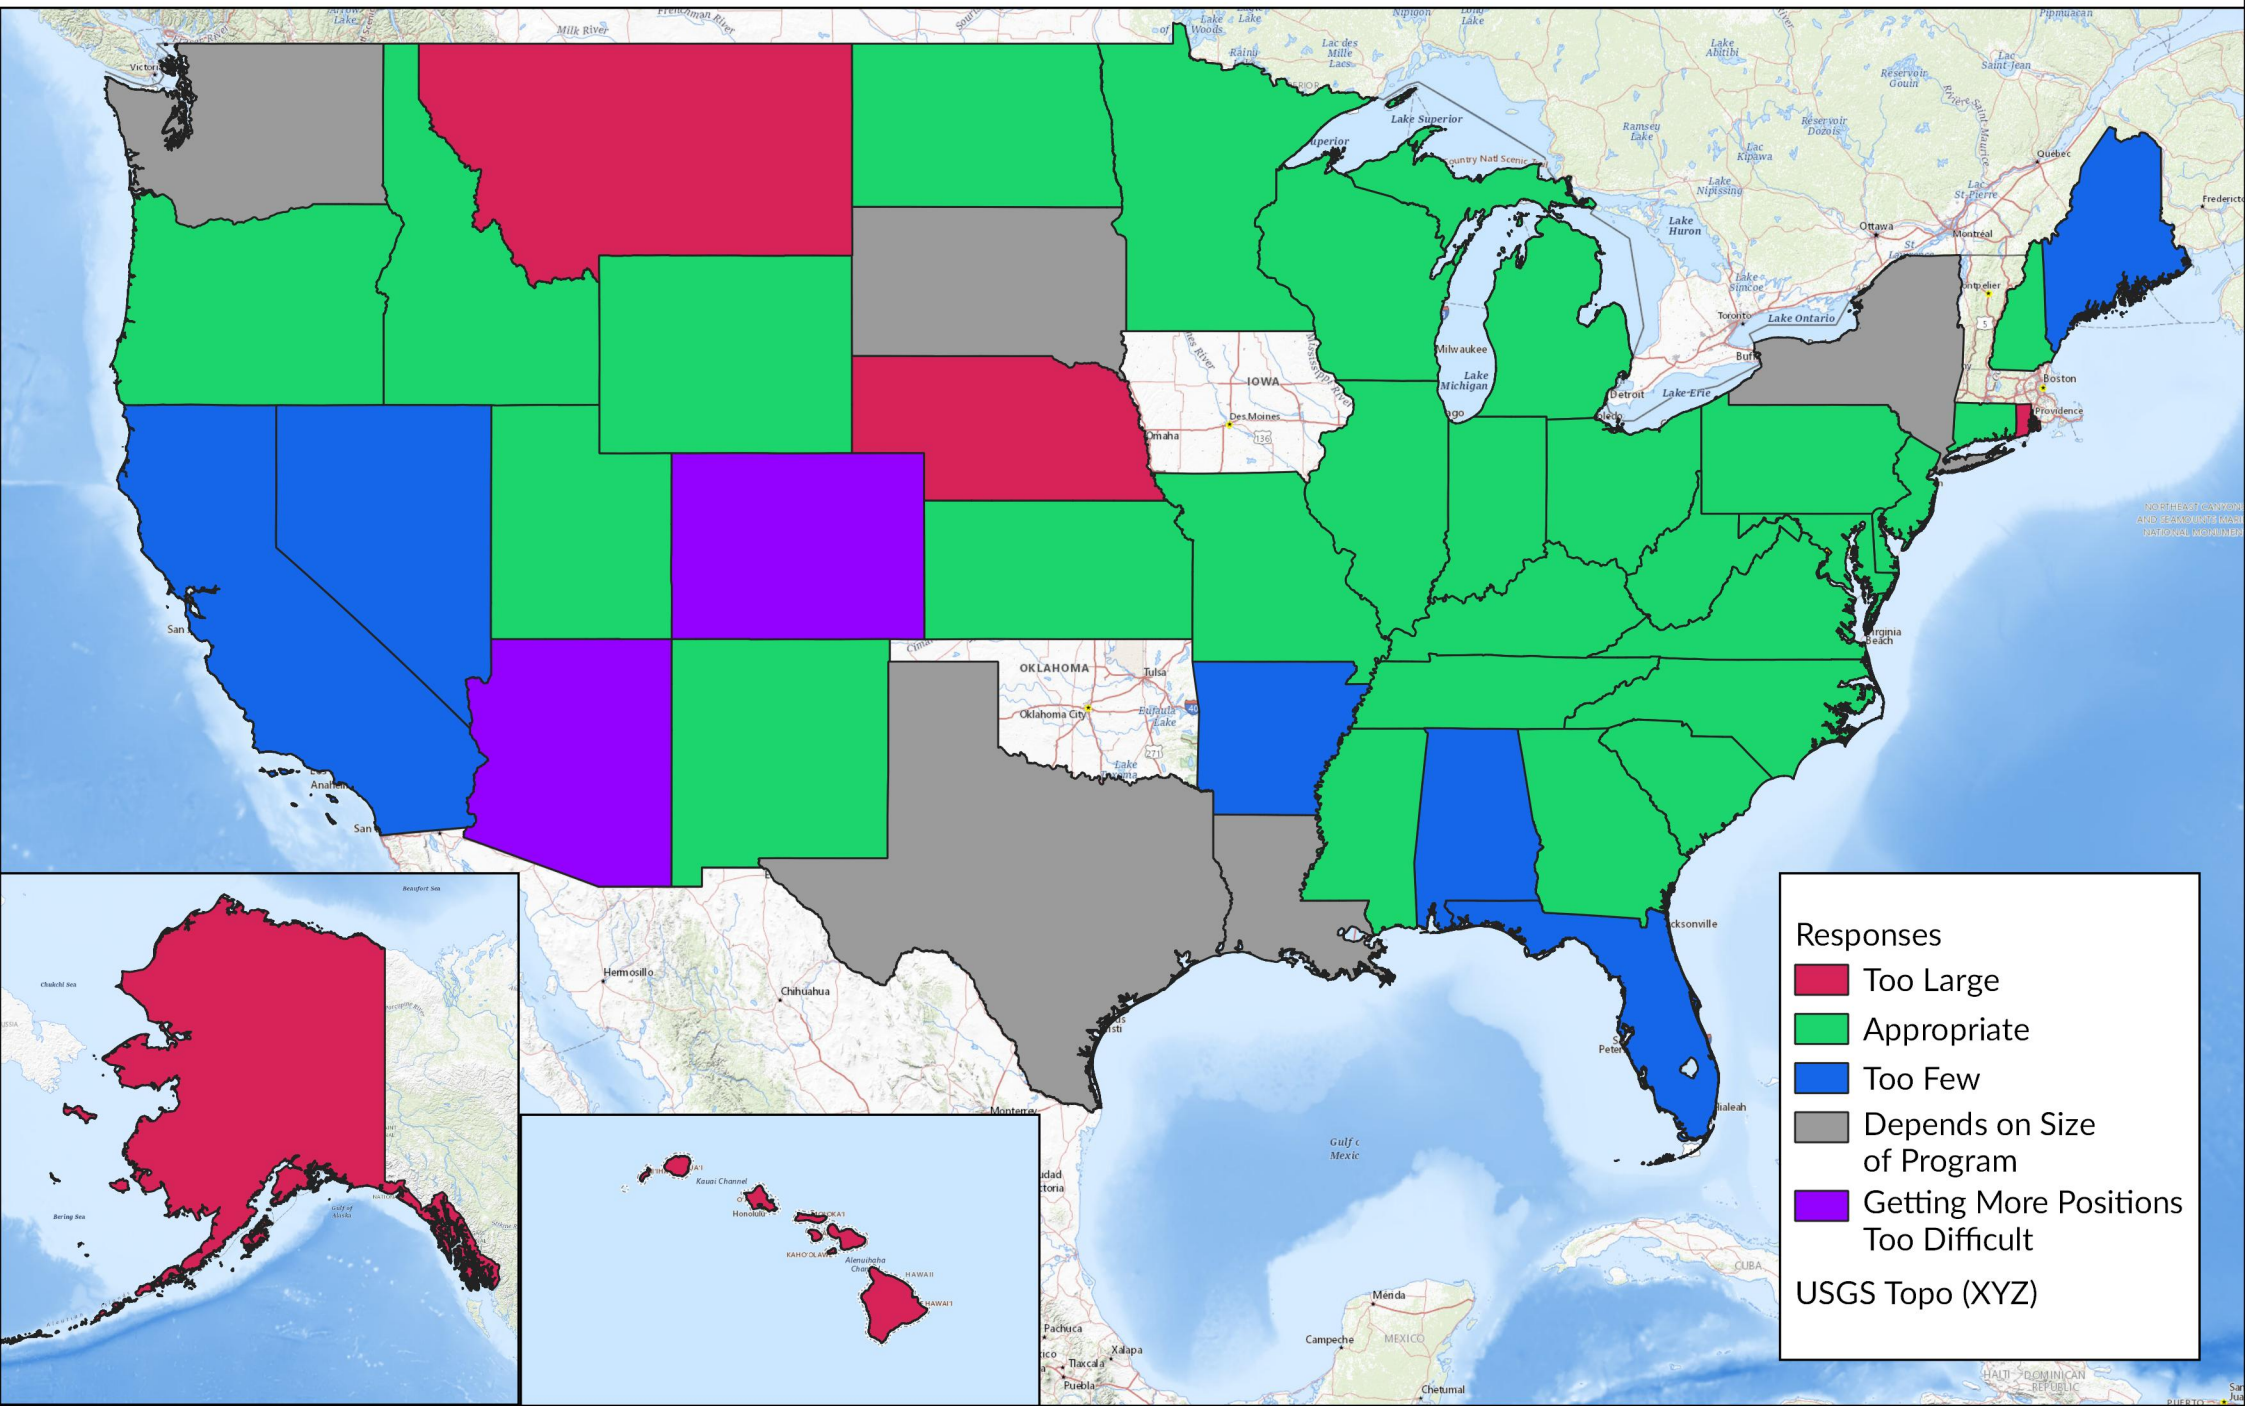

Please rate your preferences for the most optimal timing for applications and period for the annual administrative grant.

If you indicated you would either not apply for an administrative percentage to support your program, or you indicated you would initially apply for less than the maximum of 7% would your future requests...

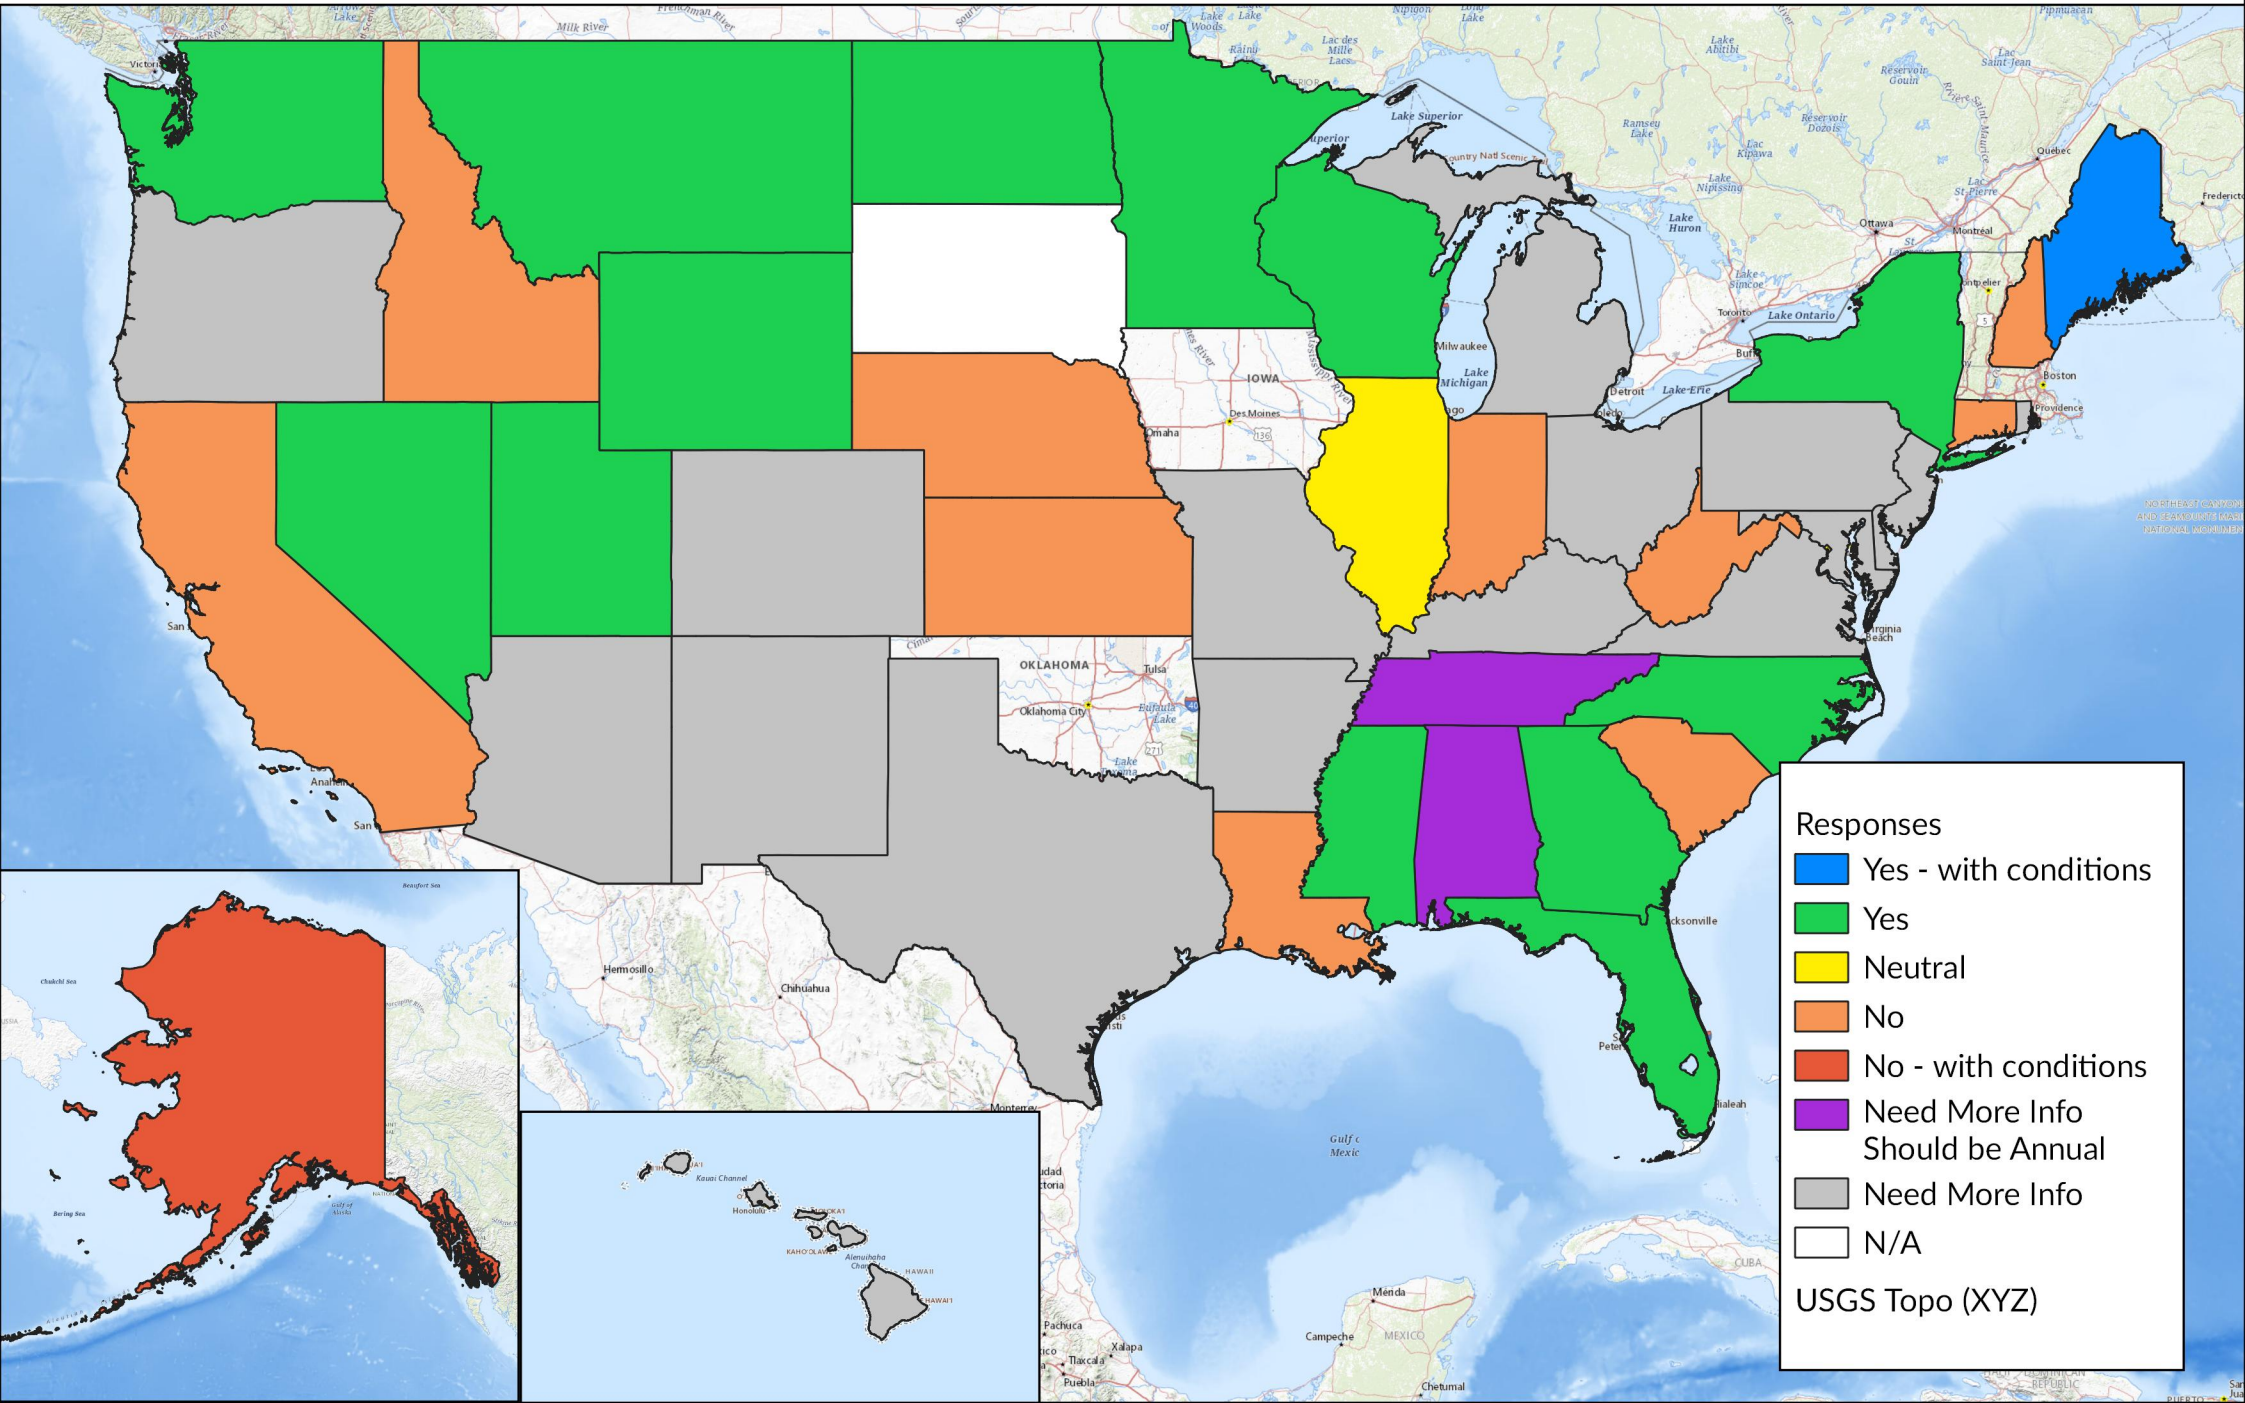

NASORLO has advocated there should be a minimum staffing level for the LWCF program of three FTE. Is this recommendation....

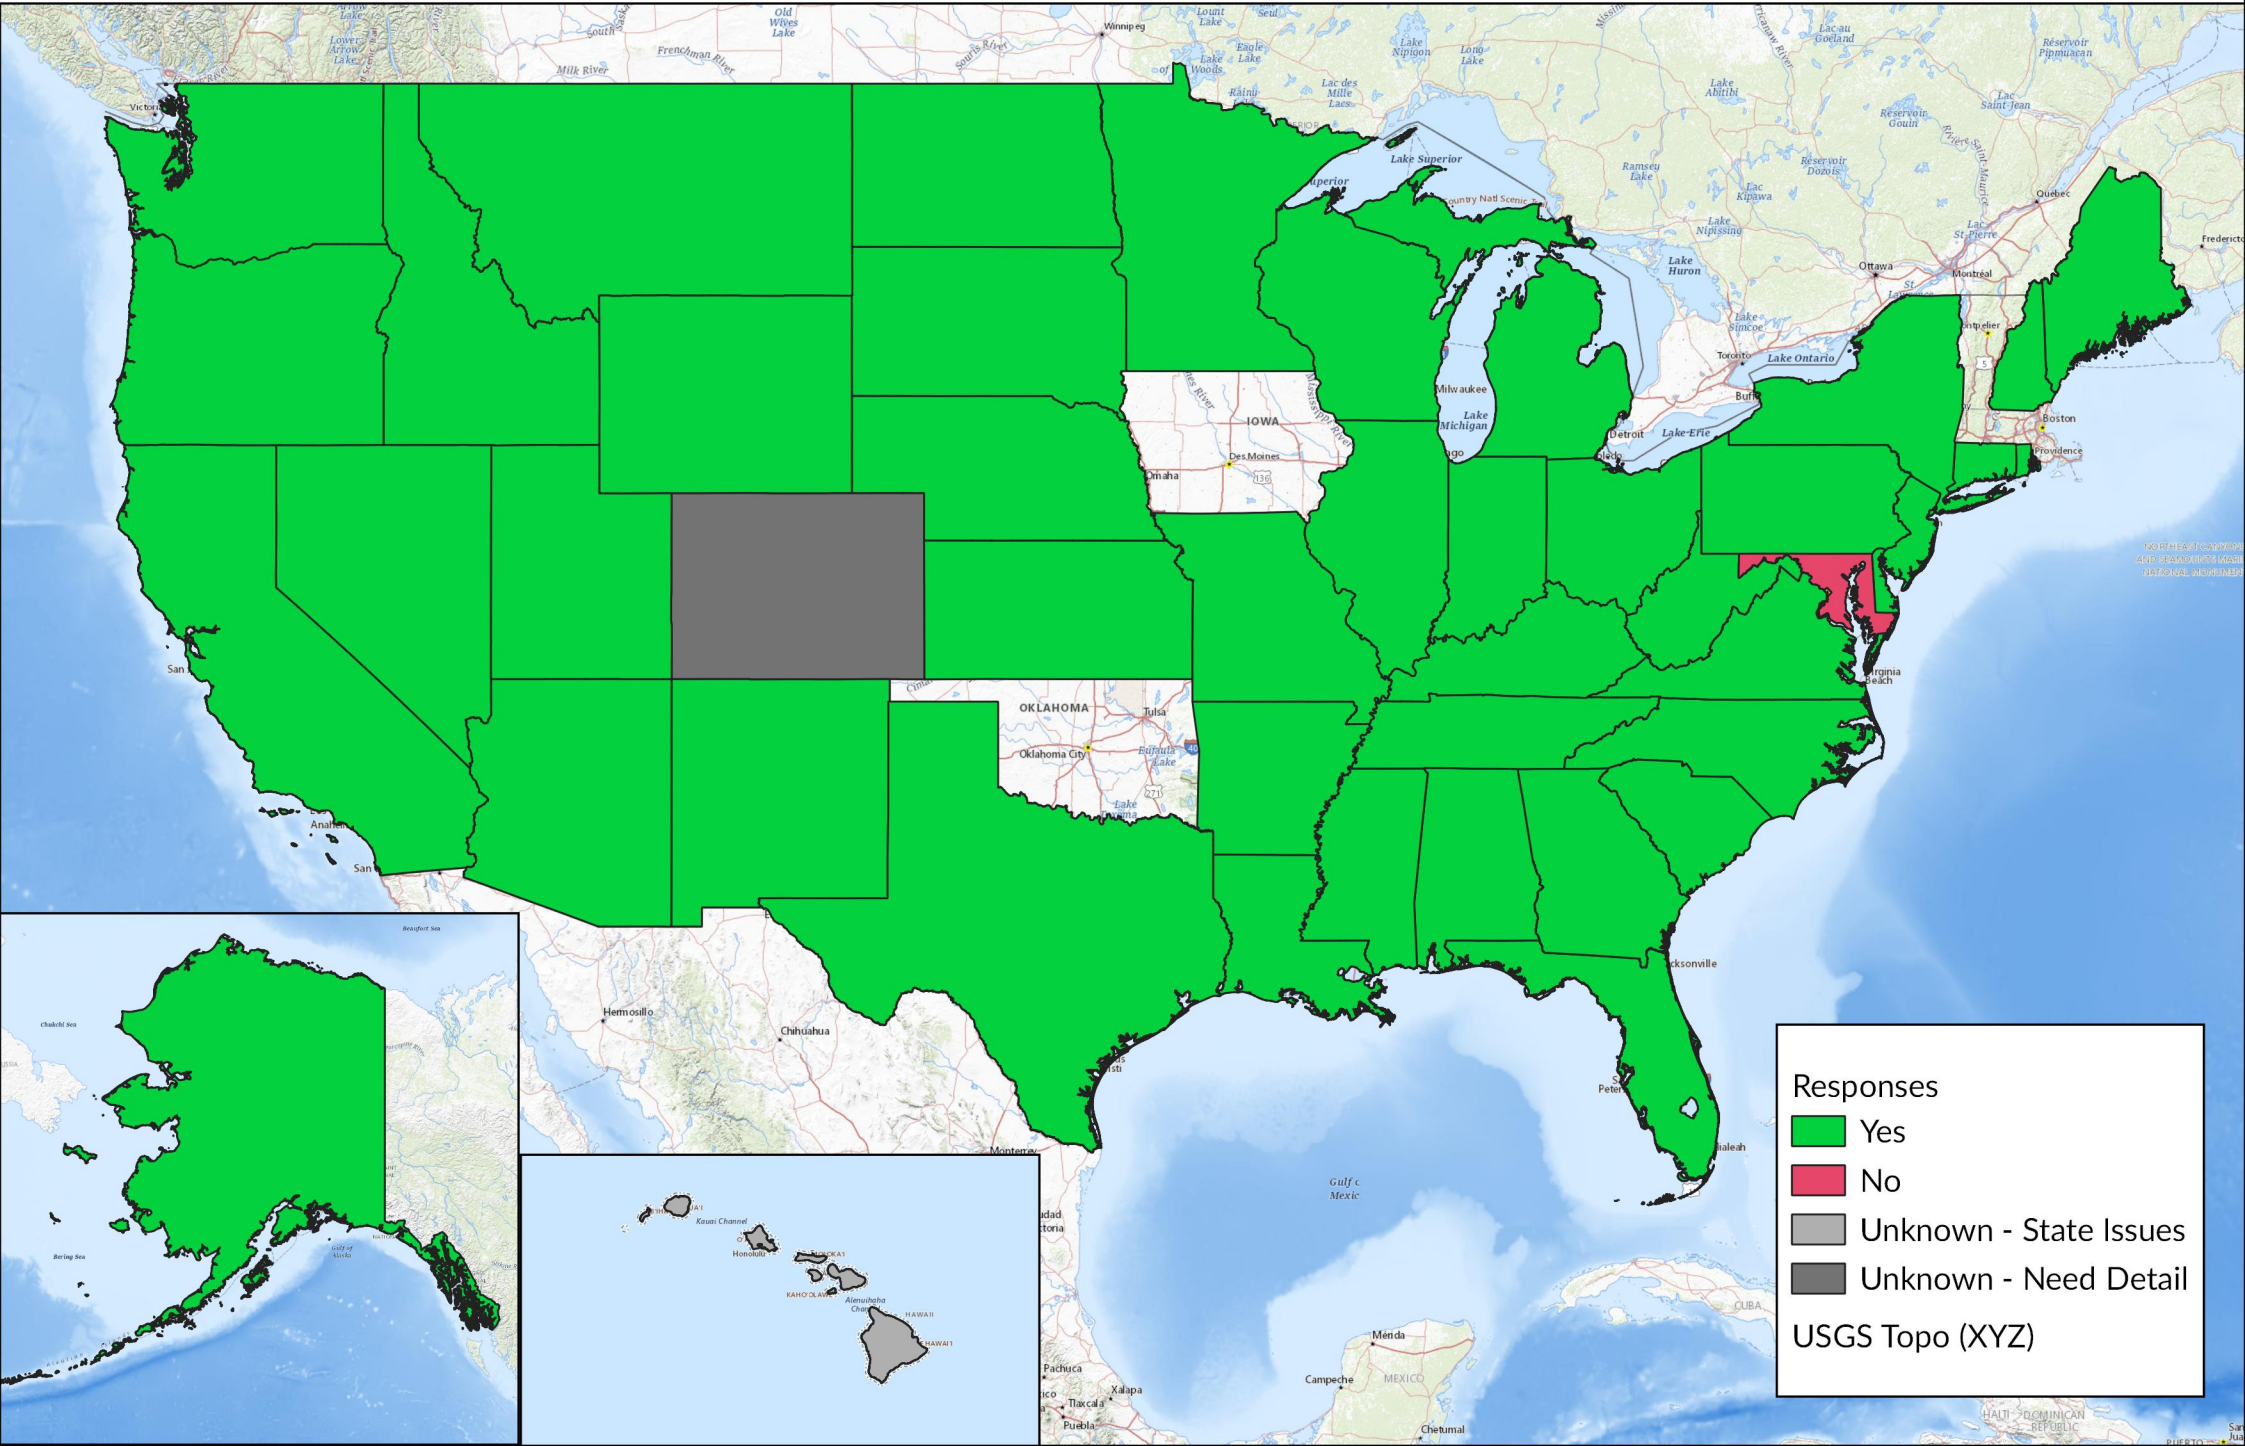

NPS has asked if biennial ( vs annual ) LWCF administrative grants would be a viable option.

# Assuming Congress approves up to 7% for State/Territorial Administrative Grants as proposed in the Administration's FY 23 Budget, are you likely to participate?
